Education

Texas Tech University

Bachelor of Science in Computer Science

Expected May 2027

Lubbock, Texas

Projects

Lumina | React, Tailwind CSS, Gemini API, LangChain, Lucide Icons

- Built an adaptive learning platform that dynamically generates personalized study modules by parsing and indexing student-uploaded course materials using LangChain for LLM orchestration and Gemini API for structured output generation.
- Reduced estimated study setup time by **70%** by architecting a React and Tailwind CSS frontend with component-level state management, enabling students to upload materials and receive structured study content in under **2** minutes.
- Shipped a fully demo-ready prototype with zero critical bugs by coordinating delivery across design, frontend, and API layers within a **24-hour** constraint, serving as the team's primary integration point between UI and backend logic.

Internship Alert Bot | Python, GitHub Actions, Discord Webhook API, CI/CD

- Eliminated duplicate job alerts across **100+** daily postings by overhauling the deduplication pipeline with SHA-based ID hashing on `company|role|date` tuples persisted to `seen_ids.json` via automated CI/CD commits.
- Automated hourly SWE internship monitoring by building a Python bot that fetches and parses HTML tables from the SimplifyJobs **2026** list, applies US and remote location filters, and routes new postings to a Discord webhook `POST`.
- Improved deployment reliability and message clarity by refactoring GitHub Actions workflow permissions, chunking payloads within the **2,000-character** Discord API limit, and redesigning the embedded message layout for faster readability.

Experience

TTU IT Help Central

Feb 2025 – Present

IT Supervisor / Student Analyst III

Lubbock, Texas

- Maintained consistent quality across **23,000+** calls and **1,500+** positive surveys by leading a team of student analysts, enforcing IT service compliance standards, coordinating shift coverage, and running structured performance check-ins.
- Resolved identity and access management issues for **12,000+** university accounts by executing targeted remediation workflows across Active Directory, BeyondTrust, Lockoutstatus.exe, and a **50,000+** entry ServiceNow ticketing database.
- Cut average call handling time by **50%** by designing a reusable diagnostic response template library covering the highest-frequency authentication, access, and connectivity failure patterns surfaced through ServiceNow ticket analysis.
- Ensured compliance and handoff continuity by triaging account lockout and permission escalation failures via Lockedoutstatus.exe and Active Directory, routing complex cases through ServiceNow with full audit trail documentation.

Andretti's Indoor Karting and Gaming

Feb 2023 – Jan 2025

Starting Line Supervisor

Katy, TX

- Increased VIP Package revenue by **33%** by building a custom Excel analytics tracker to surface sales trends, identify underperforming time slots, and design data-driven incentive programs aligned to revenue targets.
- Improved guest throughput and satisfaction scores by overseeing daily operations for **50+** staff, using shift performance metrics to identify workflow bottlenecks and implement targeted process changes across concurrent service areas.

Leadership / Extracurricular

CodePath TTU Chapter

Jan 2026 – Present

Marketing Lead

Texas Tech University

- Drove an **85%** increase in LeetCode problem completion rates by organizing structured weekly DSA study sessions, directly strengthening members' technical interview readiness across arrays, trees, and dynamic programming topics.
- Grew chapter retention by **33%** and scaled social media presence to **600+** followers by executing a structured content calendar that increased post engagement by **60%** quarter-over-quarter.
- Connected **40+** hours of peer mentorship into tangible outcomes by actively linking chapter members with internship leads, open-source contribution opportunities, and industry contacts across the TTU CS community.

Technical Skills

Languages: Python, C/C++, C#, Java, JavaScript, SQL, Assembly

Frameworks & Libraries: React, Tailwind CSS, Flask, LangChain, Discord.py, Node.js, Express.js

Developer Tools: Git, REST APIs, CI/CD Pipelines, ServiceNow, Bash Scripting, Docker

IT & Systems: Active Directory, BeyondTrust, Linux CLI, Windows Server, Lockoutstatus.exe
